

Waterproofing New Product Ranges - Waterstops

***** EXCLUSIVE TO BUILDSPAN *****

Buildspan BN Joint

Hydrophilic bentonite-butyl waterstop for the sealing of concrete construction joints. May also be used as a system component in a bentonite clayliner or claypanel waterproofing system. Free swelling up to 400%. Buildspan BN Joint may be nailed to the concrete or alternatively Buildspan PL Joint Adhesive may be used. The use of a metal net is necessary for vertical applications and strongly recommended for horizontal applications. Unsuitable for use with salt water.
